FOR IMMEDIATE RELEASE
Cornus Venus – a stunning new variety

After almost 20 years of development Cornus Venus™ a striking new hybrid between Cornus nuttallii and Cornus kousa chinensis will become available to UK gardeners.

Venus has already gained the acclaim of European nurseryman after winning a prestigious award at IPM 2008 held in Essen Germany.

Venus has extremely large creamy-white bracts, often with a diameter of 15cm, that almost cover the plant between mid to late May and lasting up to three weeks. The striking bracts make an unusual and long-lasting addition to cut-flower arrangements.

Cornus Venus™ is vigorous and hardy, with large glossy leaves, and sets a large amount of flowering buds even at a young age.

Beautiful autumn colour in shades of yellow, orange and violet add an extra season of interest.

As all dogwoods, Cornus Venus prefers a slightly acid soil. Height and spread approx. 3-4 x 2m. Pruning is not necessary but if required to keep in shape should be carried out immediately after flowering.

Available at Garden Centres from spring '09 in a 7.5Lt pot retailing at £49.99, for stockists call 01728 745100
